REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention relates to a full color three electrode surface discharge type plasma display device. The three primary color luminescent areas are arranged in the extending direction of the display electrode pairs in a successive manner and an image element is composed by the three unit luminescent areas defined by these three luminescent areas and address electrodes intersecting these three luminescent areas. The prior art of record does not teach or suggest prior to selectively addressing a discharge cell defined at an intersection between a pair of adjacent display electrodes and an address electrode, applying a voltage between at least one pair of display electrodes by which one electrode of the pair of display electrodes has a positive potential relatively to a potential of the other electrode of the pair of display electrodes, thereby to generate surface discharges in all the surface discharge cells, and store a positive electric charge on the surface of the phosphor layer, and applying an address voltage between a selected address electrode and the one of the pair of display electrodes, the address voltage having a polarity so as to generate a write discharge by being added to the positive electric charge stored on the surface of the phosphor layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis-Doon Chow whose telephone number is 571-272-7767. The examiner can normally be reached on 8:30-5:00.
